<http://fivestones-tech.github.io/My-portfolio-website/>

Summary

First of all, I have a solid background in front-end development-essential languages like HTML, CSS, and JavaScript. I also have experience working with well-known frontend frameworks like Bootstrap and content management systems like WordPress and Web flow and am currently learning TypeScript.js, react.js and three.js

Along with my technical ability, I have excellent soft skills, which I think would make me a wonderful team player. I am a strong team player with excellent interpersonal abilities, a keen eye for detail, and a love for finding solutions to challenging issues. In addition, I am a team player who values feedback and is constant

EXPERIENCE

I've placed a high value on teamwork and collaboration in addition to technical skills, which has helped me work on a number of projects with team members. I was chosen to be the group leader for one of these projects, and despite the fact that we all came from different backgrounds and had a variety of skills, I was able to manage them and bring the project into execution within the time frame that we had. I was also able to find ways to effectively communicate with everyone. My ability to communicate effectively, listen intently, and provide aid when necessary has enabled me to complete jobs quickly.

I've proven to be a well-organized person who can manage balancing multiple deadlines and obligations at once.

SKILLS

Experienced UI Developer Trained in:

- * HTML5
- * CSS3
- * JavaScript.
- * Bootstrap
- * TypeScript.js
- * Tailwind CSS

OTHER SKILLS

- * Communication
- * Team Spirit
- * Team Management
